## Music at its finest with JUPITER Quality Wind Instruments

For over 35 years we have been developing and building wind instruments according to the highest quality standards. Countless innovative ideas, such as the Waveline™ Flutes and Ergonomic Trombones, have been successfully developed. For such developments, we like to collaborate with internationally acclaimed musicians and highly qualified teachers whose input is solicited at every step along the way. JUPITER's reliable, durable and high-quality wind and brass instruments are your ticket to a promising career in music.

### ■ JUPITER 500 Series

Sturdy instruments with a smooth response. Ideal for those who wish to learn an instrument.

### ■ JUPITER 700 Series

Instruments that spark your ambition, passion, enjoyment and excitement. They support players with a remarkable quality level and great sound.

### ■ JUPITER 1000 Series

These are instruments whose quality is akin to that of the 1100 Performance Series that satisfies special demands.

### ■ JUPITER 1100 Performance Series

Instruments built using special techniques and various materials to satisfy the high demands of experienced and professional musicians.

Visit [www.jupiter.info](http://www.jupiter.info) for details.

JUPITER

### Why you should play the Saxophone!

1. The sound: Uniquely characteristic and expressive.
2. Instant gratification: play your first sounds on day one.
3. Versatile: big band, wind orchestra and solo.
4. Relatively easy to master.
5. Helps you train your dexterity and concentration.
6. Easy transition from, or to, other woodwind instruments thanks to similar fingerings.
7. Meet fellow musicians, quickly connect with people in unfamiliar places, experience the benefits of a tightly-knit musical community.

Take a look behind the scenes and learn about the production and quality of JUPITER instruments.

## Sona Pure

The adjustable palm keys can be tailored to the size of the player's hands, providing maximum comfort. (Pictured: alto saxophone)

A specially developed temperature treatment and the engraved resonance guard provide the hydraulically drawn Sona-Pure Neck—and indeed the entire instrument—with a uniquely big sound. (Pictured: alto saxophone)

The adjustment screw for the body-octave key facilitates reliable middle A-tuning. (Pictured: alto saxophone)

The adjustable octave mechanism allows you to fine-tune the octave response, while avoiding slack and affording effortless transitions from the high to the low registers.

Phosphor-bronze flat springs ensure a perfectly smooth key response. (Pictured: alto saxophone)

The elaborate engraving on the bell rounds out the 1100 Performance Series Saxophones' irresistible look. (Pictured: alto saxophone)
