## "FILED - RED CUT"

The driving force behind the **JAVA "Filed - Red Cut"** design was to offer more sonic possibilities to musicians while keeping the qualities of the original Java.

More flexible than its elder version, with a little more tonal body, the **JAVA "Filed - Red Cut"** offers a full, rich, centered sound and excellent projection with an extremely precise attack.

A relative of the **JAVA** reed family, the **JAVA "Filed - Red Cut"** is the first file cut Vandoren reed for jazz and popular music. It also benefits from a completely new design.

		1	1½	2	2½	3	3½	4	5
<b>Soprano</b>	X 10			SR302R	SR3025R	SR303R	SR3035R	SR304R
